## 1. Fatalities by State

The fatalities in Kaduna and Ogun state are really outrageous, with over 2000 cases over the period of 4 years. It is mandatory for road users along the routes of the flagged states to adhere strictly to road safety rules along its highways

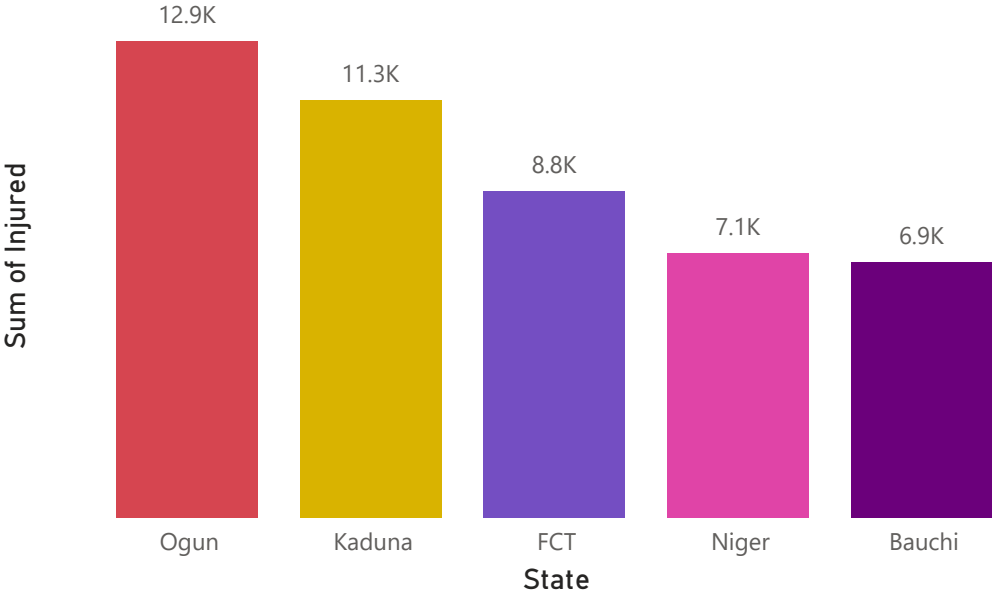

Sum of Fatalities by State

## 2. Injured by State

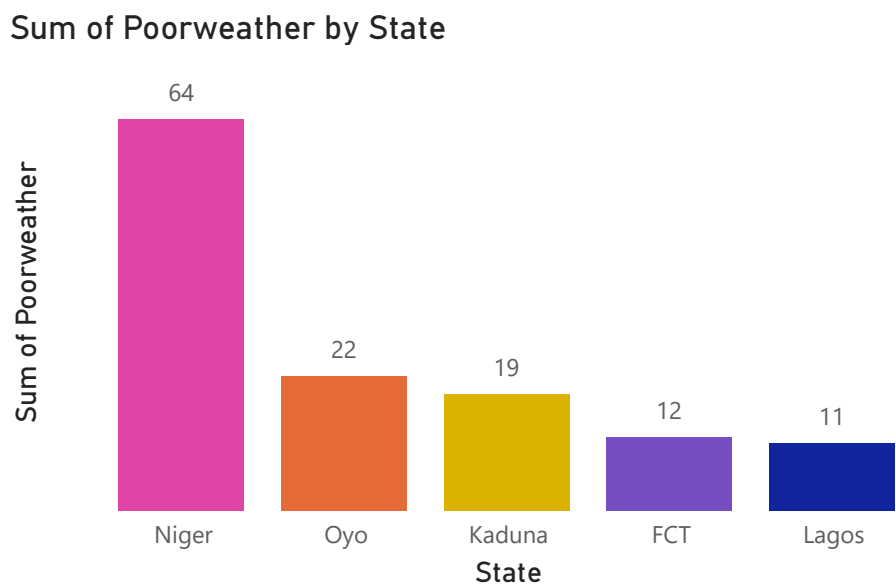

The total sum of injury cases in Ogun and Kaduna states are also high, this suggests that the commuters on these state's highway are either reckless or the conditions of these roads are rather bad.

Sum of Injured by State

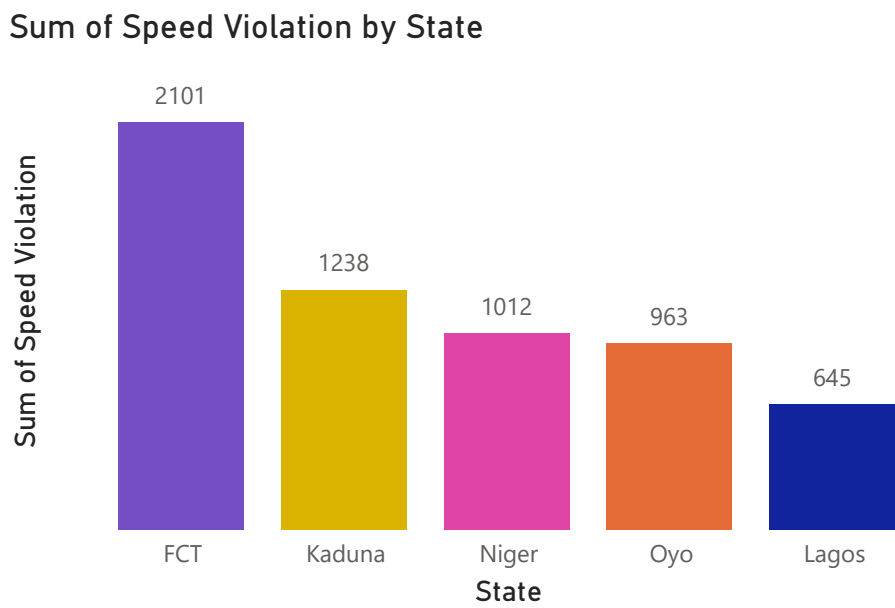

### 3. Poor weather by State

Niger state has a gigantic record of over 50% compared to other states, hence road trips around the state, should be avoided at all cost during seasons of dryness, haziness and even wetness, as rain seem to affect control and traction of tires.

### 4. Speed Violation by State

The FCT prides in the most sophisticated speed tracking devices, hence it's accuracy in tracking offenders. In this case, pedestrians and bike riders must be very careful plying roads around the FCT.

## 5. Total Crashes by Year and Quarter

The highest number of crashes in all of the years was in the Q4 of 2022 with a whopping 8.36% compared to the previous years. Preventive measures should be taken with utmost priority in these period.
